COMMUNICATION SKILLS EXERCISE – PROVE IT Talking Points

CCL is urging all MOCs to cosponsor the bipartisan PROVE IT Act ([S.1863](#)), which dictates U.S. Department of Energy reporting of average product emissions intensity. This is a necessary first step for enacting and implementing a U.S. carbon border adjustment mechanism (CBAM).

PROVE IT Act talking points

1. Sets the foundation for establishing a carbon border adjustment mechanism (CBAM) or carbon tariff on goods imported to the U.S. and the goods’ carbon intensity.
2. Directs the Department of Energy to start reporting on the emissions from U.S. industry and certain other countries for specific manufactured goods.
3. It is not a CBAM, but is an important part of what’s needed to have one.
4. It builds on bipartisan momentum to do something about international emissions.
5. Furthers the conversation on carbon pricing.
